1000 | 100 Silver Gloss

Silver Gloss is a bright, shiny silver transfer product that represents modernity and innovation. Using transfer product in this shade can add a layer of sophistication and elegance to packaging and branding materials. This shade is great for creating a sleek and professional look for products in the technology industry. In addition to its use in the commercial printing industry, Silver Gloss is also our most popular transfer product for book covers and greetings cards among other things. Its versatility makes it a great choice for creating custom invitations, high end business stationery, and luxury packaging. Whether you're looking to add a touch of opulence or modernity to your next project, this transfer product is sure to enhance your work.

The colours displayed on your screen or print are very close to the exact product colour, but are still only digital representations of the original colours. The device on which you are viewing this information or the printer you used to print this colour chart may cause colour variations. We strongly recommend that you request a sample to obtain an accurate representation of the colour.
